(Natural News) Dr. Jane Ruby talked about the Wuhan coronavirus (COVID-19) murders in many U.S. hospitals during a recent episode of “Dr. Jane Ruby STAT!”on *Brighteon.TV*. Ruby cited the “game-changing” evidence presented by lawyer Tom Renz during the Miami leg of the 2023 ReAwaken America Tour.

The “Dr. Jane Ruby STAT!” host also showed footage of Renz discussing the evidence during a press conference. According to the “Lawfare” host, the government wanted to protect doctors and hospitals engaged in this COVID-19 murder by giving them immunity in all but the most egregious cases.

Renz shared that a whistleblower pharmacist came to him with a recording of her conversation with an official from the Ascension healthcare system. The pharmacist told the official that the COVID-19 protocols they were doing would hasten the death of people. However, she was told to shut up and simply follow the protocol.

The Ohio lawyer added that he is now in possession of the whistleblower's recordings that prove the hospital killing fields are active and intentional. Moreover, he said the pharmacist's lawsuit is now moving forward.

"This is a health system in particular with 139 hospitals across 19 American states," Ruby pointed out. "How many innocent Americans have been slaughtered? This is the CDC [*Centers for Disease Control and Prevention*] protocol incentivized with huge bonuses at every step a patient encounters when they go to a hospital."

"Forced testing; fake positive PCR tests; quarantine, which means isolation in a cold, dark place without any access to your family; forced narcotics to suppress your respiration; forced remdesivir infusions to shut down your major organs. And then, of course, the inevitable forced intubation and mechanical ventilation. And don't forget the last stop – the funeral director, who also gets the last bonus in a series of federal bonus money and the COVID-19 hospital trail." (Related: Former nurse describes hospital Covid-19 protocols as "medical murder.")

Government incentivizes hospitals for murdering patients

Aside from this immunity, the government also incentivized hospitals for murdering patients.

"You get more money when we diagnose you with COVID whether you got it or not. You get more money once you get on the [ventilator]. You get more money once you die because it's a COVID death." Renz said. "So, we incentivized [them]. We paid them for murder and then we gave them immunity."

The attorney added he was looking at this case from every angle to find loopholes and ways to deal with it. He clarified, however, that they haven't filed any lawsuits regarding the hospital murders as they have to make it right. This, Renz continued, wasn't an easy thing to do.

Ruby – known for her multiple roles as medical economist, healthcare researcher and pharmaceutical development expert – said the truth will set a lot of people free even though it is heartbreaking. The evidence presented by Renz's client will reveal the criminals in white coats at the hospitals and pave the way for justice, she added.

The "Dr. Jane Ruby STAT!" host concluded by citing a Spanish proverb that she translated into English: "Justice walks with a limp, but it always arrives."
